

"Build" your own boat

1. Colour-in thickly with wax crayons on both side of the paper. This is really important because the wax makes the paper waterproof. Why not make it a Swallow, Amazon or Scarab look alike? Swallow has tan (brown sails), Amazon has white (use a white wax crayon, don't leave the sail uncoloured) and Scarab has red.
2. Carefully cut out and fold along the dotted lines.
3. Stick the sides together with a small bit of sticky tack at the top of the mast.
4. Launch your boat by placing her on the surface of the water and say, like Dorothea does when Scarab is launched, "I name you (name of boat)! And best wishes for fair winds!"
